

Rugged Earth - Ultra Durable

Rugged Earth is a range of ultra-durable polyester powder coatings for application onto architectural aluminium. Designed to mimic stone, this textured coating range is applied with either a chromate free pre-treatment or Keronite for the ultimate in durability.

Bespoke finishes are available to architects' specifications on request. We are able to produce a range of stone finishes to your requirements.

"Designed to withstand some of most hostile environments on earth."

Order your Powder Coating information pack for full details of our extensive architectural powder coating services.
